

Altion Services

OSS development and integration

Developing, maintaining and supporting OSS inventory solutions. Integrating products from **Altion**, Amdocs OSS, Comptel (AXIOSS), Celona and Sidonis.

In a competitive market, Operator OSS must be more cost efficient than ever before. OSS products are excellent value for money if they are well integrated and efficient to operate. **Altion** have worked with operators for 20 years to ensure that their OSS works hard for their business. **Altion** make OSS inventory work.

Today, Operator OSS must support more services than ever before. **OSS costs** are under severe pressure in a competitive market.

Any OSS investment must yield full value for the operator. However, making OSS products work for your business means overcoming **challenges**:

Cost: the cost of integrating an OSS product can run out of control if the right focus and knowledge is not applied from the start. Large systems integration projects can be costly for operators with high fees and unforeseen customizations.

Know how: each operator is different, each OSS product is different. Implementing a working business solution requires expert knowledge of:

- OSS product features in detail
- OSS inventory for multiple technologies
- Smart and efficient OSS integration
- operator inventory processes

Combining the expertise of operator staff, product vendor staff and systems integrators can be difficult. With the right experience and expertise, the issues and costs for these projects can be controlled and minimised.

Over 20 years, **Altion** have focused on OSS inventory and have built a strong reputation as expert, practical and cost effective OSS inventory partners. **Altion** deliver:

- ✓ **Value:** **Altion** provide a dedicated, focused and expert team who take responsibility for delivering real operator solutions quickly and efficiently. Our business has grown because we deliver real value with highly competitive pricing for development, systems integration and support.
- ✓ **Know how:** **Altion** are experts in the area of OSS inventory and OSS integration. We have successfully developed, integrated and supported bespoke solutions for many years and are happy to reference cost-effective solutions for fixed and mobile operators world-wide. **Altion** are integration partners for Amdocs OSS, Comptel, Celona and Sidonis. We have built expert knowledge of these product sets through exciting and challenging projects for a wide range of operators. We are proud to include references from major operators whom we have helped to realize the full value of these products (see overleaf).

*Over 20 years, **Altion** have built a strong reputation as expert, practical and cost effective OSS inventory partners.*
